(*) Many automotive group form joint ventures to produce vehicles.

In order to avoid double counting, produced vehicles are counted into one group only: their national group.

So, the above figures for some groups, mostly chinese, may not equal their total world production.

This latter includes their own production, and their assembly in joint ventures with other groups.

Here are the 2010 production of the main chinese groups, including joint ventures:

FAW First Auto Work	2,572,260
Dongfeng Auto Corp.	2,769,883
SAIC Shanghai Auto Industry Corp.	3,620,653
China Chana Automobile Group	2,378,052
Beijing Automotive Industry Group	1,504,083
